

HP Device Registration Service

HP's Device Registration Service¹ streamlines device registration in Intune within 48 hours of the order shipment date. The service supports one or multiple tenants, with or without group tags. It can be combined with other HP Configuration services and provides an option for stock units.

Reduces the time IT spends on deploying, managing, and retiring devices.

Devices are registered and profile can be assigned before device delivery

Reduces the infrastructure required to register the devices.

THIS SERVICE

Seamless device integration²

Devices registered in your preferred Modern Device Management

Registered after shipment

Devices are registered within 48 hours from the order shipment date so the user's profile can be assigned before the unit is delivered to them.³

Automation & Reporting

Automation designed to ensure fast and accurate registration of your devices, and a dedicated report that provides enhanced monitoring, efficient data management, and secure access to registration data.

Combine services

This service is available as a standalone service, and it can be combined with any other HP Configuration Services for pain-free device roll-outs⁴

Intune settings

Autopilot user profiles and settings can be applied from Intune for a simplified end-user out of the box experience upon delivery of device⁵

Tenants and Group Tags⁶

This Device Registration Service supports one or Multiple Tenants for fixed or dynamic group tags⁷
